Subject line: Motley Fool Issues First-Ever 9X Buy Alert

Preview text: Our analysts are calling this "A True Winner At A Discount"

Something historic just happened here at The Motley Fool

We've identified a stock so exceptional that we've now recommended it 9 times... **the only stock ever in the *Stock Advisor* universe to receive that many recommendations.**

Join Now For XX% Off* And Discover The Pick

Since we first picked it in July 2016, this extraordinary company has delivered an astonishing 1,904% return.

So why is **NOW** the time?

Because not only has this stock returned close to **20X** since we first recommended it 8 years ago... but it's also trading at a steep **61.5% drop** from its peak. Our analysts are calling it a "**true winner at a discount.**"

And I don't know about you, but as an investor trying to make money... this is *exactly* what I've been looking for. Especially when so many stocks have felt bloated at their all-time highs recently.

Not to mention this company is a global leader with a very bright future, handling nearly \$950 billion in transactions across 175 countries. We're talking more online sales than eBay, Target, The Home Depot, and Best Buy... *combined.*

The potential for profit is immense, with revenues growing at a compounded annual rate of more than 40% over the past 5 years.

Our quant projections show potential annual returns of 13% to 15% for shareholders. *That's a heck of a lot better than the 4.5% your high-yield savings is giving you.*

Now in the past, when we've re-recommended stocks, they tended to be our highest conviction picks... and some of our biggest winners.

- Like Nvidia. We recommended it first in 2005 (a *whopping 77,162% return*), again in 2009, and once again in 2017.
- Or Tesla. Our first recommendation was in 2012 (now up **8,726%**). But we knew it would be a winner, so we recommended it again 3 more times.
- Netflix received a total of 7 recs. And it wasn't our first rec that saw the highest returns! In fact, it was a re-recommendation that saw sky-high returns of **36,162%**.
- Then there's Amazon, receiving a total of 5 recs in *Stock Advisor*, with the initial returns surpassing **24,000%**.

All of this is to say that when we re-recommend a stock, it's a BIG deal. And often a very *profitable* one too.

But this is the first time we've ever recommended a stock 9X. That's unheard of. We truly think investors who *don't* buy this stock today will regret it in 5 years time.

Imagine being part of the select group of investors capitalizing on this rare moment. That select group are members of *Stock Advisor* – and only they will be able to see this 9X pick.

But right now, to help you get in while this stock is still a steal – we're offering XX% off for email subscribers.
